RESPONSE TO OFFICE ACTION  
Page 2

Please amend the subject application as follows:

IN THE SPECIFICATION

Page 25, rewrite paragraph starting at line 14 to read as follows:

a1  
The moveable member 504 includes a device grasping portion 506 and is pivotably disposed within the handle member 502 so that the device grasping portion 506 can be selectively moved between a grasping position and a mounting position. In the mounting position, as more clearly shown in FIG. 14, the moveable member 504 is depressed into the handle member 504 so as to cause the device grasping portion 506 to move away from the stylet 508 thus preparing the insertion tool 500 so an entry alignment device can be mounted thereon. Thereafter the movable member 504 is released thereby preferably causing the device grasping portion to move towards the stylet 508 thereby grasping the device and removably securing the entry alignment device to the insertion tool 500 as more clearly shown in FIG 15.

Page 30, rewrite paragraph starting at line 1 to read as follows:

a2  
The stop portion 204 is configured and arranged so as to provide a sufficient surface area and thickness to prevent the infusion cannula 200a from being drawn or drifting into the intra-ocular volume of the eye. The stop portion 204 and the inserted portion 206 are configured so as to include in each a lumen that communicates with each other and the lumen in the nozzle portion 202a. In this way, the fluid from the infusion source flows through the successive lumens and into the intra-ocular volume of the eye.
